

True to our name, Evolve has transformed the emergency power market. Get the proven protection of the Evolution Series Power Package. Evolve is committed to critical power applications, providing your business the right solution exactly when you need it.

### TESTIMONIAL

“As 7/24/365 financial services company we are always looking for ways to ensure uptime. The ability to continue our operations is critical to maintaining customer satisfaction and providing them with the services they need on a timely basis. The resiliency of our power infrastructure is critical in meeting our customer needs and with regards to our backup generators, we wanted to take steps to enhance our availability. We met with Evolve to understand their scalable solution and how we could enhance our current emergency power system.

“Evolve proposed a scalable power generation solution that has multiple engines to create a 2MW genset in a single enclosure, in the same footprint as a traditional 2MW genset.

“This package lowers our maintenance costs, increases resiliency, decreases fuel consumption thereby increasing runtime, and reduces operational cost. In addition to the increased levels of redundancy and reliability we also now have zero downtime for maintenance. As a valued partner, Evolve’s solution greatly exceeded our expectations.”

John Arndt-Vice President Operations Technology & Resilience

# EVOLUTION SERIES GENERATORS

# EVOLVE POWER GENERATION SCALABLE EMERGENCY POWER PACKAGE

Protected by U.S. Patent

**EVOLUTION SERIES  
POWER PACKAGE**

- Patented\*
- Scalable
- Capital Cost Saving
- No Maintenance Downtime
- Retain Footprint for Future Power
- High Availability

**SIMPLIFY**

- Eliminate Load Banks
- Eliminate Rental Power
- Eliminate Day Tanks
- Eliminate Single Point of Failure

**BENEFITS**

- Lower Maintenance Costs
- Made in the USA
- Parts Readily Available
- Easy to Service
- Standardized Components
- Highly Secure

**SCALABLE EVOLUTION SERIES GENERATORS**

As your company grows, so does your power generation needs. With the new Evolution Series, Evolve can provide you a scalable power generation solution that grows when you do. Save money today and grow tomorrow.

**THE RIGHT POWER WHEN YOU NEED IT**

Expertly designed with space for multiple generators in a single enclosure, the Evolution Series Power Plant space is reserved for growing power needs, saving your company upfront costs while retaining flexibility for future growth. When fully deployed, the system provides redundancy and no downtime maintenance. Engineered redundancy incorporated into each package makes our product a fiscally responsible choice day-one; a cost conscience choice upon installation; and ultimately a sound, cost saving solution for your business.
